AMENDMENTS TO THE CLAIMS

Please amend claims 1-5 as follows. This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended) A graphical user interface comprising:

an editing window;

means for enabling a user to specify interactively edit in the editing window one or more transformation hierarchies including one or more transformations operators, wherein a transformation operator provides transformation data as an output;

means for enabling a user to specify interactively edit in the editing window ~~and~~ one or more effects trees, wherein at least one effect operator in the effect tree has one or more inputs for receiving transformation data and has a local transformation specification that is combined with the received transformation data; and

means for enabling a user to connect an output of a transformation operator to an input of an effect operator for receiving the transformation data.

2. (Currently Amended) The graphical user interface of claim 1, wherein an effect operator also has an input for receiving image data and an output for providing the received image data processed according to the transformation data.

3. (Currently Amended) The graphical user interface of claim 1, wherein the received transformation data is combined with the local transformation specification of the effect operator as a pre-transform.

4. (Currently Amended) The graphical user interface of claim 1, wherein the received transformation data is combined with the local transformation specification of the effect operator as a post-transform.

5. (Currently Amended) The graphical user interface of claim 1, wherein transforms operators in a transformation hierarchy and effects operators in an effect tree are both kinds of time-varying objects.
